This is a reminder to complete your final projects in all courses that have provided one. Not only is the final project worth 10% of your overall course grade, but it will also support the marking period 4 grade adjustment process.

If your marking period 4 grade is higher than all three of your prior marking period grades, then you will keep that grade. If your marking period 4 grade is lower than any prior marking period grade, then your marking period 4 grade will be adjusted to the lowest prior marking period grade, once you complete your final project. Overall, it is very important to locate and submit your final project on time. Please reach out to your teachers if you have any questions about the final project or grading. Please let me know if you have any questions as well!
